## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of claims 1 and 2 in the reply filed on May 9, 2005 is acknowledged.
2. Claims 3 and 4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on May 9, 2005.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamaji *et al.*

Yamaji *et al.* (US 6,159,837) discloses a conductive bump comprising a first metal layer 4, a conductive paste body 7 formed on the first metal layer, and a second metal layer 8 formed on the paste body such that the paste body is sandwiched between the first and second metal layers.

Regarding claim 2, Yamaji *et al.* further discloses a first metal layer has a base portion which is bonded to a bonding pad 2 and a peripheral portion extending from the base portion in a

transverse direction relative to the base portion and a recess between the base portion and the peripheral portion to confine a recess filled with the paste body [Figure 2B].

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art teaches conductive bumps formed of conductive paste.

6. A copy of the EAST search history is enclosed.
